for Commercialisation of

**Portable Ultra-Violet based Box Sterilizer &
Modular Movable Ultra-Violet based Indoor
Room Sterilizer**

CALL FOR PROPOSALS: Fighting COVID-19

PROJECT SECTOR: Health & Medical

SUB-CATEGORY: Large area sanitization and sterilization

TDB has approved financial support to M/s Evobi Automations Pvt Ltd, Bangalore for "Portable Ultra-Violet based Box Sterilizer & Modular Movable Ultra-Violet based Indoor Room Sterilizer" through an agreement signed on 25th September 2020. The company has submitted an application in response to its invitation for proposals for technologically innovative solutions towards fighting COVID-19.

The company has developed Ultraviolet Sterilizers in two different models, i.e. Portable Model and the other a Movable model which can be ported to any robotic or non-robotic system. The products are very relevant in sterilizing surfaces and places by killing germs and viruses. The device is electric powered and the movable one has 360 degree moving sterilizing mechanism. If attached to a movable robotic system, it can be used in large spaces where sterilization is required. The product can be used to disinfect medical devices, household items, large areas like hospitals, schools, modes of transportation, etc.
