**“Daylight Harvesting Technologies to reduce carbon footprint and improve the building energy efficiency”**

Agreement Signed on 03.03.2022

Technology Development Board, a statutory body of Department of Science & Technology, Government of India, has approved financial support to Hyderabad based M/s Skyshade Daylights Private Limited. The company is engaged in roots starting with design & build operations of large skylight domes for building atriums and solar thermal technologies.

The company is offering a complete solution for “Daylight Harvesting of Solar Energy” through their indigenously developed technologies to reduce carbon footprint and improve building’s energy efficiency. The technology, harvest huge quantities of sunlight for a building, making it available for illumination of the entire building, which reduces electrical energy consumption by 70-80%. With this, the company aims to create Green & Net zero buildings, contributing to important national missions under the National Action Plan on Climate Change (NAPCC).
